SUMMARY

Staff Mobile Engineer with 5+ years of experience in cross-platform mobile development, specializing in Flutter and React Native. Proven ability to lead the creation of AI-powered mobile applications, optimize rendering performance, and implement robust architectures like Clean Architecture and MVVM. Successfully enhanced feature onboarding times by 40% and reduced cross-module merge conflicts by 55%. Adept at integrating scalable cloud services, improving application stability, and driving engineering excellence through technical mentorship.

EXPERIENCE

AlhadiTech 18 Oct. 2026 – Present
Staff Mobile Engineer Lahore, Pakistan

- Promoted from Senior Flutter Developer after completing probation, effective 18 October 2026.

AlhadiTech 16 July 2026 – 16 Oct. 2026
Senior Flutter Developer Lahore, Pakistan

- Joined as Senior Flutter Developer and completed the probationary period on 16 October 2026.

10Pearls (Pvt.) Ltd July 2025 – May 2026
Senior Software Consultant Lahore, Pakistan

- Spearheaded React Native development for two AI-powered products (AI Assessment Kiosk and AI Photo Editing Suite), successfully launching both on the App Store and Play Store within stipulated deadlines.
- Instituted Clean Architecture with MVVM across a 6-engineer codebase, which accelerated new feature onboarding by 40% and decreased cross-module merge conflicts by 55%.
- Diagnosed three rendering performance bottlenecks using Flipper and React DevTools, subsequently optimizing state management and bridge calls, thereby reducing UI jank from 18 dropped frames per second to under 2 in release builds.
- Integrated Firebase Authentication, Cloud Messaging (FCM), and Crashlytics, achieving a 99.5% push notification delivery rate and eliminating undetected crash incidents for two consecutive quarters.
- Facilitated bi-weekly code reviews for four engineers, elevating unit and UI test coverage from 42% to 75% and reducing the average pull request review cycle from four days to two.
- **Projects** : **Semieta Site Access, AIMS+**

10Pearls (Pvt.) Ltd June 2023 – June 2025
Software Consultant Lahore, Pakistan

- Developed a Smart EV Charging Network application in React Native, incorporating Bluetooth device control and real-time session telemetry, which achieved over 10,000 monthly active users across three countries within six months of its release.
- Engineered real-time messaging and video conferencing capabilities for an Enterprise Communication Platform using React Native, maintaining over 500 concurrent users with average call-setup latency below 200 milliseconds.
- Delivered a timezone-aware Enterprise Resource Booking System for 200+ staff across five offices, featuring multi-timezone conflict detection that reduced double-booking incidents by 30%.
- Rectified 12 state-management regressions attributed to race conditions in asynchronous API calls by implementing structured Redux middleware fixes, consequently decreasing the Application Not Responding (ANR) rate by 35% over two sprints.
- Enhanced unit, UI, and API test coverage from 30% to 68%, which enabled a GitHub Actions CI gate that successfully blocked 95% of regressions before they entered the quality assurance queue.
- **Projects** : **Healthacademia, Mplace, Staftr, Pando Electric**

10Pearls (Pvt.) Ltd June 2022 – June 2023

Associate Software Consultant Lahore, Pakistan

- Constructed a Medical Exam Prep React Native application featuring over 500 question sets, adaptive difficulty, and a timed simulation mode; the app attained 8,000 downloads and a 4.4-star rating in the first quarter post-launch.
- Re-architected an E-Learning quiz engine, transitioning from synchronous callbacks to asynchronous data loading, which halved quiz-screen load times and improved 30-day user retention by 20%.
- Specified and integrated more than 15 REST endpoints in collaboration with 3 backend engineers, utilizing versioned API contracts to maintain zero breaking-change incidents across 4 staged rollouts.
- Developed a Freelance Marketplace React Native application from conception to App Store and Play Store release within four months, achieving a 4.6-star rating from over 300 reviews within six weeks of its launch.
- **Projects** : **10Pearls University, Jeenie**

Wishsol Pvt Ltd Apr. 2021 – May 2022

Junior Software Engineer Lahore, Pakistan

- Built 3 React Native client applications that integrated REST APIs with backend systems, delivering 8 feature releases over 13 months while concurrently completing a full-time Computer Science degree at NUST.
- Contributed to a Clean Architecture refactoring initiative under senior supervision, successfully reducing redundant component code by 25% across 2 production applications.

Techylem Solutions Pvt Ltd May 2021 – Sept. 2021

Web Developer Intern Lahore, Pakistan

- Maintained Flutter-based mobile applications for both Android and iOS, triaging over 15 defects and enhancing stability across 2 release cycles.
- Assessed and resolved performance issues in production builds, resulting in a 20% reduction in average screen render time.

EDUCATION

National University of Sciences and Technology (NUST) Aug. 2018 – May 2022

Bachelor of Science in Computer Science Islamabad, Pakistan

PROJECTS

10Pearls University | *React Native, TypeScript, Firebase, Redux/Zustand, REST APIs*

- Engineered and deployed a scalable enterprise mobile learning platform with multi-state management structures.
- Integrated reliable crash reporting pipelines, analytics trackers, and robust background push notifications.
- Links: Play Store | App Store

Pando Electric Gen 2.0 | *React Native, TypeScript, MVVM, Amplitude, Sentry, Bitrise*

- Architected an IoT energy tracking and data visualization dashboard using robust Clean Architecture patterns.
- Implemented asynchronous API syncing and polling with fallback mechanisms to ensure high telemetry data accuracy.
- Links: Play Store | App Store

Healthacademia | *React Native, TypeScript, Firebase Auth, REST API Integration, Sentry, Bitrise*

- Developed a performant educational mobile engine following an optimized structured MVVM repository layout.
- Streamlined user onboarding paths and notification delivery behaviors via native Firebase cloud modules.
- Implemented feature-based functionality where features can be turned on and off through APIs.
- Links: Play Store | App Store

Mplace | *React Native, TypeScript, Firebase Auth, REST API Integration, Redux, RTK Query*

- Developed a professional staffing mobile application following an optimized structured MVVM repository layout.

- Streamlined user onboarding paths, staffing, time tracking, and hours logging.
- Improved performance by debugging dropped-frame issues and adding integration tests.
- Links: Play Store | App Store

Staftr | *React Native, TypeScript, Amplitude, Redux, RTK Query, Firebase, Sentry, Bitrise*

- Developed a PwC staffing mobile application using clean architecture and app flavors.
- Revamped the Mplace look and feel to integrate the PwC guidelines on every screen, including onboarding and project creation.
- Completed the breaking upgrade from React Native 0.72 to 0.81 for the Android 16 KB page-size requirement.
- Links: Play Store | App Store

Jeenie | *Flutter, Dart, Riverpod/BLoC, Real-Time Streams, Telemetry Analytics*

- Built a 24/7 cross-platform live interpreting network managing interactive stream states cleanly via robust state tools.
- Minimized call-setup network lag while adding Firebase diagnostic monitors to reduce application exceptions.
- Links: Play Store | App Store

Semieta Site Access | *Swift, SwiftUI, iOS Native Core, MVC/MVVM Architecture*

- Constructed a highly secure corporate access control system leveraging reactive Swift layouts natively.
- Optimized low-level network transactions and integrated analytic data engines to monitor real-time security events.
- Link: App Store

AIMS+ | *React Native, JavaScript, Firebase Suite, Push Notification Routing*

- Delivered an optimized exam configuration suite with localized data layers and unified API versioning pipelines.
- Ensured predictable background service loops for instant question-set retrieval and profile diagnostics.
- Links: Play Store | App Store

SKILLS

Core Frameworks : React Native, Flutter, SwiftUI, Native Modules, TurboModules, JSI
Languages : TypeScript, JavaScript (ES6+), Swift, Dart, Python, Node.js, Django, SQL
State & Data : Redux, Context API, Zustand, Riverpod, BLoC, REST APIs, WebSockets, Bluetooth BLE
Cloud & DevOps : Firebase (Auth, FCM, Crashlytics, Firestore), Git, Fastlane, GitHub Actions CI/CD
Architecture : Clean Architecture, MVVM, Modular Layouts, SOLID Principles, TDD, Agile/Scrum
Spoken Lang. : English (Native), Urdu (Native)
